Matrix Mixer and Amplifier with DSP

Rapid installation and intuitive operation with the most robust quality in the industry.

MM-700F-AS 6x4 Matrix Mixer with DSP

The MM-700F-AS is a 6-input and 4-zone output matrix pre-amplifier with easy analog control of mixing functions and digital processing. While browser remote control is available for computers and smart devices, no PC is required to set up and operate this versatile unit. Matrix and DSP settings, can be made simply, without the need for a computer. Time spent on installation and system tuning is greatly reduced. The paging function has two-levels of priority: (1) manual activation or (2) automatic (vox) activation. Enhanced functionality is tailored to both background music and paging applications. The MM-700F-AS is ideally suited for establishments where different kinds of background music are required for different zones or where staff paging announcements are selectively directed to one area such as a restaurant or sales area. The optional WP-700-AS provides volume control and source selection for up to four zones. Wireless browser-based remote control is available via any computer or smart device at no additional cost.
